IN THE UNITED STATES PATENT OFFICE

Appln serial No. 10/083,529

Applicant: U.N. Das

Title: a method of stabilizing and potentiating...

Docket No UND 99.02 D 1

Primary Exr: Alton Pryor

Group Art Unit 1616

Supplemental Response to the Office Action mailed 01/20/2006

The following documents are enclosed with this supplemental response:

1. A substitute specification text as directed by the Examiner;
2. A marked-up specification text showing text changes;
3. A marked-up copy of the amended claims showing deletions and additions made in the December 20, 2005 response; and,
4. A clean copy of the claims as amended in the response filed on December 20, 2005.

Marked-up specification: In the attached marked-up specification (document 2 above) it is noted that the specification-text changes are limited to typographical corrections as identified and seen on text pages 6, 14, 19 20 and 21 of document 2. The remaining text pages in item 2 are unchanged from the original as filed.

Substitute Specification: The attached document 1, i.e., the substitute specification, is identical to the substitute specification submitted with the December 20, 2005 response, and includes the following format changes directed by the Examiner and are not considered new matter:

1. Insertion of paragraph numbers for the text; and,
2. Capitalization of the trademarks "Angiostatin" and "Endostatin" throughout the text, as directed by the Examiner.

Remarks:

The entire contents of the cover letter (copy enclosed) from the amendment filed on December 20, 2005 including the response-comments for the claim rejections, objection to the text, and the request for the transference of the sole Figure, still apply and should be reconsidered along with this supplemental amendment.
